CANVAS 2D

LET'S TAKE A LOOK

Leverages off the existing HTML canvas

JavaScript exclusive API

Based on OpenGL ES (Embedded Systems) 2.0

Cross Platform

Web GL is free

WEB GL
GRAPHICS HARDWARE ACCELERATION

GPU

VS

CPU

WHAT'S IN THE BOX?

Vertex Shader Position Calculator**Fragment Shader** Colour Chooser

RAW WEB GL CODE

Settings! So many settings...

So much mathematics...

Too much plumbing, not enough fun...

LET'S TAKE A LOOK

SETTING UP A JS PROJECT

YEOMAN

GRUNT

BOWER

ADVANTAGES

Useful boiler plate project templates.

Standard project structure.

Standardised way to build your project.

Real-time builds and notifications of errors.

Real-time deployments for testing.

Easy way to manage dependencies.

LET'S TAKE A LOOK

Three.js

Too cool for a logo

threejs.org/examples

PLAIN
WEB GL

```
var box = {  
  Verticies: [  
    1.0,  1.0, -1.0,  
    1.0, -1.0, -1.0,  
   -1.0,  1.0, -1.0,  
   -1.0, -1.0, -1.0
```

```
. . .and ±112 more lines
```

THREE.JS

```
var box = new THREE.CubeGeometry(1,1,1)
```

OBJECTS MESH - TOOLS

RENDERER

SCENE

CAMERA

Renderer *Renders the scene with the camera's point of view*

Scene *Contains zero or many meshes*

Mesh *Structure and behaviour of an object*

Material *Texture of an object*

Camera *Looks at scene*

Controls *Manipulate camera*
